ELEVATE

Elevate Suites Kigali: Digital Strategy & Operational Transformation

Prepared by: Sadick Achuli (Lead Developer & Creative Director)

Project: Premium Headless Rebuild, Full Media Direction, & Operational Excellence

Target Goal: Market Domination through Elite Design & Technology

Executive Summary

This document serves as the master blueprint for the complete digital and operational rebirth of Elevate Suites Kigali. The objective is to transition from a static web presence to an elite, high-performance platform that captures the property's soul and maximizes direct revenue. By combining expert-level software engineering with high-end creative direction, this project establishes a new gold standard for hospitality in Rwanda.

Digital Evolution: Squarespace vs. The Enterprise Stack

It is vital to understand the "Before and After" impact of moving from a generic template to a custom-engineered solution.

Feature	Current (Squarespace)	New (Sanity + Next.js)	The Impact
Ownership	Platform rental model.	Full Code Ownership.	No "platform lock-in" or monthly rent for the builder.
Speed	Shared/Slow Templates.	Instant (Apple-level).	Higher booking conversion from busy travelers.
Security	Generic/Shared .	Enterprise/Gated.	Vault-level privacy for V-Club VIP guests.
Booking	Simple / External.	Real-Time 2-Way Sync.	Eliminates Overbooking errors and manual work.

Investment & Comparison Matrix

Feature	Tier 1: Basic Fix	Tier 2: Modern Overhaul	**Tier 3: The Agency Standard (Marriott, Serena, and Saxon style)**
Main Objective	Visual Cleanup	Revenue & Growth	**Market Leadership**
Media Direction	Client-provided photos	Basic Professional Stills	**Full Media Direction & Production**
UX Design [1]	Basic Template	Custom React App	**Elite Custom Animation & Art Gallery**
Booking Logic	External Link (OTAs)	Integrated API [2]	**Full Inventory & Payment Sync**
Analytics Suite [3]	Basic Traffic Tracking	Detailed Conversion Tracking	**Advanced Guest Behavior Insights**
Page Count	5 Core Pages	10-12 Expanded Pages	**Unlimited Brand Ecosystem**
Staff Training	None	System Documentation	**Full In-Person Operational Training**
Marketing Launch	None	None	**Social Media Ads & TikTok Setup**
Free Management	1 Month (24h Response)	1 Month (24h Response)	**1 Month (Priority Support)**

Investment	1,200,000 RWF	3,800,000 RWF	**7,700,000 RWF**

[1] UX Design: The "User Experience" is how easy it is for a guest to navigate and book.

[2] Integrated API: A digital bridge allowing the website to "talk" directly to the booking system.

[3] Analytics Suite: Tools that track where guests come from and what they click on.

Deliverables by Tier

Tier 1: The Basic Fix (3–4 Weeks)

- **Core Pages:** Home, Suites Overview, Gallery, Location, and Contact.
- **Search Engine Optimization (SEO):** Making the site "readable" for Google so the hotel appears when people search for it.
- **Analytics:** Basic setup to see visit volume.

Timeline(Tier 1):
Focus: Rapid deployment and visual cleanup.

- **Week 1:** Design audit and structural setup.
- **Week 2:** Content migration and basic SEO implementation.
- **Week 3**: Analytics setup and final testing.
- **Week 4:** Official launch and 1 month of free management begins..

Tier 2: Modern Overhaul (6–8 Weeks)

- **Home (Advanced):** High-speed landing page with custom branding.
- **Suites Category Page:** A beautiful overview of all room categories.
- **Individual Suite Pages (x3):** Dedicated pages for Standard, Executive, and Presidential suites.
- **Dining Overview:** Professional presentation of your food and beverage offerings.
- **The Bar & Lounge:** Dedicated page for your nightlife/cocktail experience.
- **Photo Gallery (High Res):** Categorized galleries (Rooms, Dining, Views).
- **Booking Management:** Guest-facing page to view or modify their booking.
- **Analytics Implementation:** Google Tag Manager (GTM) setup to track "Book Now" clicks.

Timeline(Tier 2):
Focus: Revenue growth and API integration.

- **Weeks 1–2:** Custom UI/UX design phase and brand alignment.
- **Weeks 3–4:** Full React development and Sanity CMS configuration.
- **Weeks 5–6:** Integration with your Booking Engine/PMS for real-time inventory.
- **Week 7:** Advanced tracking setup and staff documentation.
- **Week 8:** Launch and transition to 1 month of management support.

Tier 3 Deep Dive: The Elite Agency Standard (10–12 Weeks—Recommended)

This tier is a full-service agency partnership designed to maximize direct revenue and international visibility. Example hotels include Marriott Kigali, Serena Kigali, and Saxon Johannesburg.

A. Deliverable Pages & Sections (Unlimited Branding)

- **The Hero Hub:** Cinematic Home, Video Landing Page, Brand Story, Mission & Core Values, and Awards/Press.
- **Accommodation Hub:** Master Overview, individual pages for every specific suite configuration, "In-Room Dining" menu page, and Guest Services/Amenities guide.
- **Dining & Gastronomy:** Individual landing pages for the Restaurant, Poolside Bar, and Piano Lounge, plus a dedicated "Special Events & Brunches" page.
- **The V-Club (Elite Membership Portal):** A dedicated, high-security landing page for the private members' club. Includes membership inquiry forms, digital brochure downloads, and high-end galleries (directed by me).
- **The Experience:** Art Collection Gallery, Green/Sustainability Philosophy, and a detailed "Explore Kigali" Curated Travel Guide.
- **Custom Freedom:** Inclusion of any additional pages of your choice to fit evolving business needs.

B. Exclusive Agency Features & Marketing Launch

- **Total Media Authority:** I personally direct every image and video on the site. I lead the photographer/videographer on lighting, angles, and composition to ensure a 5-star look.
- **High-Impact 3-Day Launch Campaign:** Upon launch, I will run free social media ads (Facebook & Instagram) for 3 days to drive immediate traffic.
- **TikTok & Content Strategy:** I will set up a dedicated TikTok page and use AI tools like OpusClip to turn our high-end video content into media updates.
- **Social Media Management:** Full management of your socials during the initial launch period.
- **Curated Social Proof:** Selective reflection of the best Google reviews on-site to build elite trust.

C. Content Autonomy via Sanity CMS

If you choose not to go with a retainer, you will not be "locked out" of your site.

- **User-Friendly Dashboard:** Your staff will be able to manage room rates, update menus, swap photos, and manage V-Club inquiries in real-time.
- **In-Person Training:** I will spend time at the hotel personally training your team to ensure they are 100% confident.

Management & Autonomy(Tier 3)

A. Plain English SEO (Search Engine Optimization)

The SEO ensures that when someone types "Luxury Suites Kigali" into Google, the hotel doesn't just appear; it stands at the front of the line. This involves labeling every image, speeding up page loads, and writing descriptions that Google trusts, making the property more visible to high-net-worth travelers.

B. The Editor's Manual: Managing Content

Should the hotel opt out of a monthly retainer, detailed guidance and training sessions will be provided to ensure staff can independently manage text, prices, images, holiday package and event pop ups, and room availability via the **Sanity Studio** (Control Panel). This ensures the team is 100% confident in maintaining the site's freshness without external help.

C. Future Technical Requirements

While day-to-day content is easily managed by staff, an expert-level developer will be required for:

- Adding entirely new structural features (e.g., a new loyalty point system).
- Performing deep brand redesigns or changing global font/color architectures.
- Managing complex API security updates for the V-Club portal.

Technical Infrastructure & Security

- **Zero-Overbook Guarantee:** Real-time two-way sync with the **PMS** (Property Management System) ensures availability is always accurate across the site and Booking.com.
- **V-Club Security:** VIP privacy is managed via encrypted "Digital Vaults" (NextAuth/Clerk) and multi-factor login.
- **Future-Proof Handover:** A full **Technical Ownership Folder** is provided upon completion. This contains the "keys" to the code, allowing any senior React engineer to manage the site in the future.

Detailed Media Production Shot List (Tier 3 Only)

- **Cinematic Video (4K):** Drone shots of the property near the Kigali Golf Resort and "lifestyle" loops.
- **The V-Club Signature:** Elegant shots of the Private Salon, highlighting the dedicated bar and skyline views.
- **The Hero Exterior:** High-detail, wide-angle shots of the building at twilight.
- **Suite Intimacy:** Macro shots of premium linens and welcome amenities.

Third-Party Costs & Coverage Disclosure

Item	Purpose	Estimated Monthly Cost
Booking Engine / PMS	Manages room inventory and syncs with OTAs.	$50 - $150 (Tier 2 & 3)
Enterprise Hosting	Vercel Pro (Ultra-speed delivery).	$20 (Scales with traffic)
Analytics & GTM	Professional tracking and guest behavior data.	**Free** ($0)
Sanity Studio	Cloud storage and Content Control Panel.	$0 (Free) to $15 (Pro)

What the Investment Covers: Full custom build (full hotel site, vclub portal, sanity setup to change text, images, site pop ups for holiday packages, news, booking management, and portal management), Creative Direction, Staff Training, Analytics setup, and the initial 3-day ad spend for Tier 3.

What it Does NOT Cover: Professional talent fees (photographer/videographer day-rates) and the recurring third-party subscriptions listed above.

Timeline(Tier 3):
Focus: Market leadership and elite membership portal.

- **Weeks 1–2:** Creative Direction & Media Strategy (Planning the drone and 4K lifestyle shots).
- **Weeks 3–4:** Elite UI/UX Design (Custom animations and V-Club member portal layouts).
- **Weeks 5–7:** Core Engineering (Next.js build, Gated V-Club security, and full inventory sync).
- **Weeks 8–9:** Media Production & Content Population (Leading the shoot and editing TikTok clips).
- **Week 10:** In-person staff training and rigorous security testing.

- **Week 11:** High-Impact 3-Day Launch Campaign (Executing Facebook/Instagram ads and TikTok campaign).
- **Week 12:** Project Handover and start of 1.5 months Priority Support.

Terms and Conditions

A. Agreement Execution: *Both parties must sign this agreement before work can commence.*

B. Payment Terms: *The customer shall be invoiced* ***50% of the total investment upon contract execution*** *as a commencement fee. The remaining* ***50% shall be invoiced and paid upon the successful completion*** *and launch of the project.*

C. Deliverable Scope: *Any changes to the deliverables after signing will result in an adjustment to the estimate and may require an addendum.*

D. Marketing Launch Duration: *The "Exclusive Agency Features & Marketing Launch" (Ads and TikTok setup) is a 3-day engagement post-launch. Any services requested beyond this duration will be billed at an hourly rate of* ***50,000 RWF/hour****.*

E. Maintenance Period: *Free management support ends exactly 30 days (Tier 1 & 2) or 45 days (Tier 3) after the site goes live.*

9. Why This Partnership Sets You Apart

Investing in this project(Tier 3) means choosing a partner who blends high-level engineering with a deep understanding of Elevate Suites ecosystem and luxury branding.

- **Elite Speed:** Utilizing the same "Edge" technology used by Apple and Nike.
- **Bespoke Creative Direction:** Not just a coder, but a director who ensures your visuals scream "5-Star."
- **Accessibility:** Direct, jargon-free communication and in-person staff training.
- **Direct ROI:** A system designed specifically to reclaim the 15-20% commission lost to third-party booking sites.

Next Step: Which Tier would you like to proceed with?
